

# Preparing for the Implementation of IPV6 in the Australian Government

#### **Peter Dale**

### ICT Skills and Emerging Technologies

#### ICT Governance in the APS

**Management Advisory Committee** 

Secretaries' Committee on ICT

Chief Information
Officer
Committee

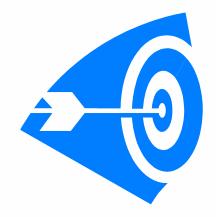

Business Process
Transformation
Committee

Chief Information
Officer Forum

# **Developing Awareness**

- IPv6 Primer
- Report on Policy, Operational, Procedural and Technical implications of an Australian Government transition to IPv6
- Constituencies
  - Chief information Officer Committee
  - Chief information Officer Forum
  - Cross Jurisdictional Chief Information Officer Committee

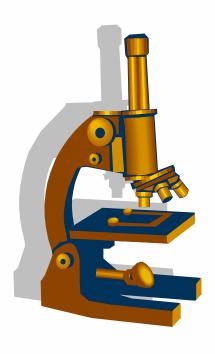

# Implementing IPv6

- It is on the Australian Government's Agenda
- Not "if", but "when"
- It will present challenges
- To some extent, it is already here
- There is no "flag" day

# The Australian Government's Approach

- Considered and methodical
- Business case based approach
- Learning from other Governments
- Picking the timing

#### Issues for Resolution

#### Security

The ability of IPv4 to continue to support applications

The compelling applications requiring IPv6

**Standards** 

#### **POLICY ISSUES**

- Policy implementation issues;
  - Cost of transition
  - A compelling business case
  - Updating the security policies of agencies
  - Procurement policies

# Operational and Procedural Issues

- Operational and Procedural implementation issues;
  - Governance
  - Readiness of ISP's and telecommunications providers in the provision of IPv6 addresses

#### **Technical Issues**

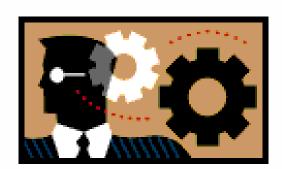

#### Technical Implementation issues

- Impacts on existing hardware and software
- Maintaining interoperability
- Addressing
- Information security
- Available applications
- Standards
- Performance
- Training

#### Other Issues

- No current intentions to mandate IPV6 for Government Agencies
- Co-existence with IPv4
- Porting existing applications

### Preparing for IPv6

- Procuring and developing IPv6 capable assets
- Minimise the risk if possible, disable where not required
- Ensuring Agency readiness

# **Agency Preparation**

- Training
- Experimenting
- Inventory of all hardware and software
- Understanding what equipment is already IPv6 capable
- Opening discussions with vendors, ISPs and telcos
- Sharing intelligence
- Watching the experiences of other governments

# QUESTIONS?
