

**Our Journey to IPv6**  
And why we're not in a rush

**Roger Yerramsetti**  
Network Services Manager

**1 – Doing what we do best**

2 – What we have already done

3 – What we have planned

4 – Why we are not in a hurry

IPv6 Summit— 18 October 2011 2

## The new number 2.

Source: Company reports, other public media and management statements, DSL only and excludes HFC customer.

1 – Doing what we do best

2 – What we have already done

3 – What we have planned

4 – Why we are not in a hurry

## Transition Strategy

**Opportunistic**

Build in capability gradually

**Transparent**

Customer shouldn't notice

IPv6

**Dual Stack**

Transition using 6rd mechanism

**Agile**

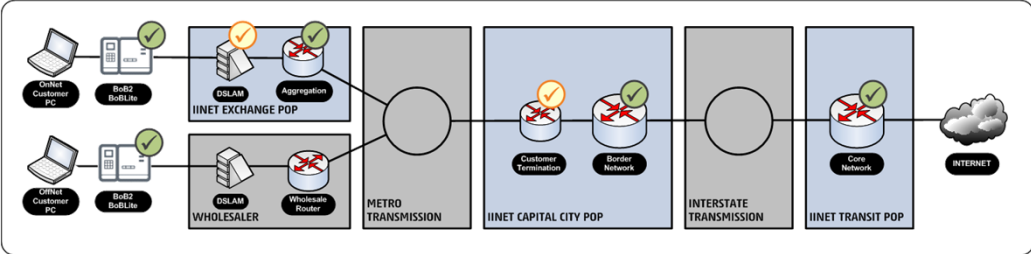

Capability to mobilise quickly

*Our strategy is to gradually introduce IPv6 connections, services and content for customers and this transition should be invisible to them.*

IPv6 Summit— 18 October 2011 5

## Where we are at

- Network was the easy bit
- Focus shifting to systems (IPAM, Billing, CRM, AAA, etc)

IPv6 Summit— 18 October 2011 6

1 – Doing what we do best

2 – What we have already done

**3 – What we have planned**

4 – Why we are not in a hurry

IPv6 Summit– 18 October 2011 7

Initiatives underway

- Corporate Website
- BoB2™ / BoBLite™
- Customer Email
- Recursive DNS
- Customer Hosted Websites
- BSS/OSS/AAA Systems
- Customer connections

## “What is IPv6”

**Dam Square, Amsterdam**  
July 2011

IPv6 Summit – 18 October 2011 10

**“What’s In it for Me”**

“What are your IPv6 plans?”

*What's in it for me?*

1. Content
2. CPE
3. Customer Drivers
4. Commercial Drivers

Ready when you are!    Considering it!    Don't care!

inet connect better

IPv6 Summit— 18 October 2011 13

**These have commercial drivers**

**Strong service and innovative brand**

inet connect better

IPv6 Summit— 18 October 2011 14

Summary 

- We have an IPv6 Adoption Strategy
- Will build in capability opportunistically
- Fundamentally no commercial drivers
- But... can transition quickly if we need to

IPv6 Summit– 18 October 2011 15
